Summary

Blockchain Developer (Fresher) with a strong understanding of blockchain fundamentals, smart contracts, and decentralized applications (DApps). Proficient in Solidity, Web3.js, and Ethereum, with hands-on experience in building and deploying smart contracts. Familiar with consensus mechanisms, cryptography, and token standards (ERC-20, ERC-721). Enthusiastic about DeFi, NFTs, and blockchain security, with a passion for learning and contributing to innovative blockchain solutions. Eager to apply skills and grow in a dynamic development environment.

Projects

Decentralized Voting System – DApp's (Solidity)

2025

Built a decentralized voting smart contract using Solidity on Ethereum. Implemented secure voting, one-vote-per-address logic, and on-chain vote storage.

Ensured security with smart contract best practices and gas optimization.

Tested and deployed on Ethereum test network using Remix and MetaMask.

Seed-Tracking – DApp's (Solidity)

2025

Developed and deployed a Solidity-based Seed Tracking DApp with functionalities for product registration, ownership transfer, and transaction history tracking.

Ensured secure data management, implemented validation mechanisms, and optimized smart contract design with a focus on gas efficiency and security best practices.

Education

Advanced Course in Block Chain Technology

2024 – 2025

Savitribai Phule Pune University

CGPA : 8.32

Bachelor of Computer Science

2021 – 2024

Savitribai Phule Pune University

CGPA : 8.32

HSC 12th

2020 – 2021

Maharashtra State Board

Percentage: 84.80%
