PROJECTS :-

Student Management System smart contract using Solidity

Dec 2024 - Present

[GitHub Link](#)

- Developed an Smart Contract using Solidity for decentralized student record management.
- Implemented **smart contracts** to store, update, and retrieve student data securely on the **Ethereum blockchain**.
- Ensured **data integrity, immutability, and access control** using blockchain principles.

Crowdfunding Smart Contract (Solidity)

2024

[GitHub Link](#)

- Developed and deployed a decentralized crowdfunding smart contract using Solidity.
- Implemented funding goal tracking, contribution management, and refund mechanisms.
- Ensured security with smart contract best practices and gas optimization.
- Conducted testing Deployed on Ethereum test net.

Seed-Tracking - DApp's (Solidity)

2025

[GitHub Link](#)

- Developed and deployed a Solidity-based Seed Tracking DApp with functionalities for product registration, ownership transfer, and transaction history tracking.
- Ensured secure data management, implemented validation mechanisms, and optimized smart contract design with a focus on gas efficiency and security best practices.

EDUCATION
